# REAR BENCH SEAT BASE: REMOVAL - REFITTING

parts always to be replaced:

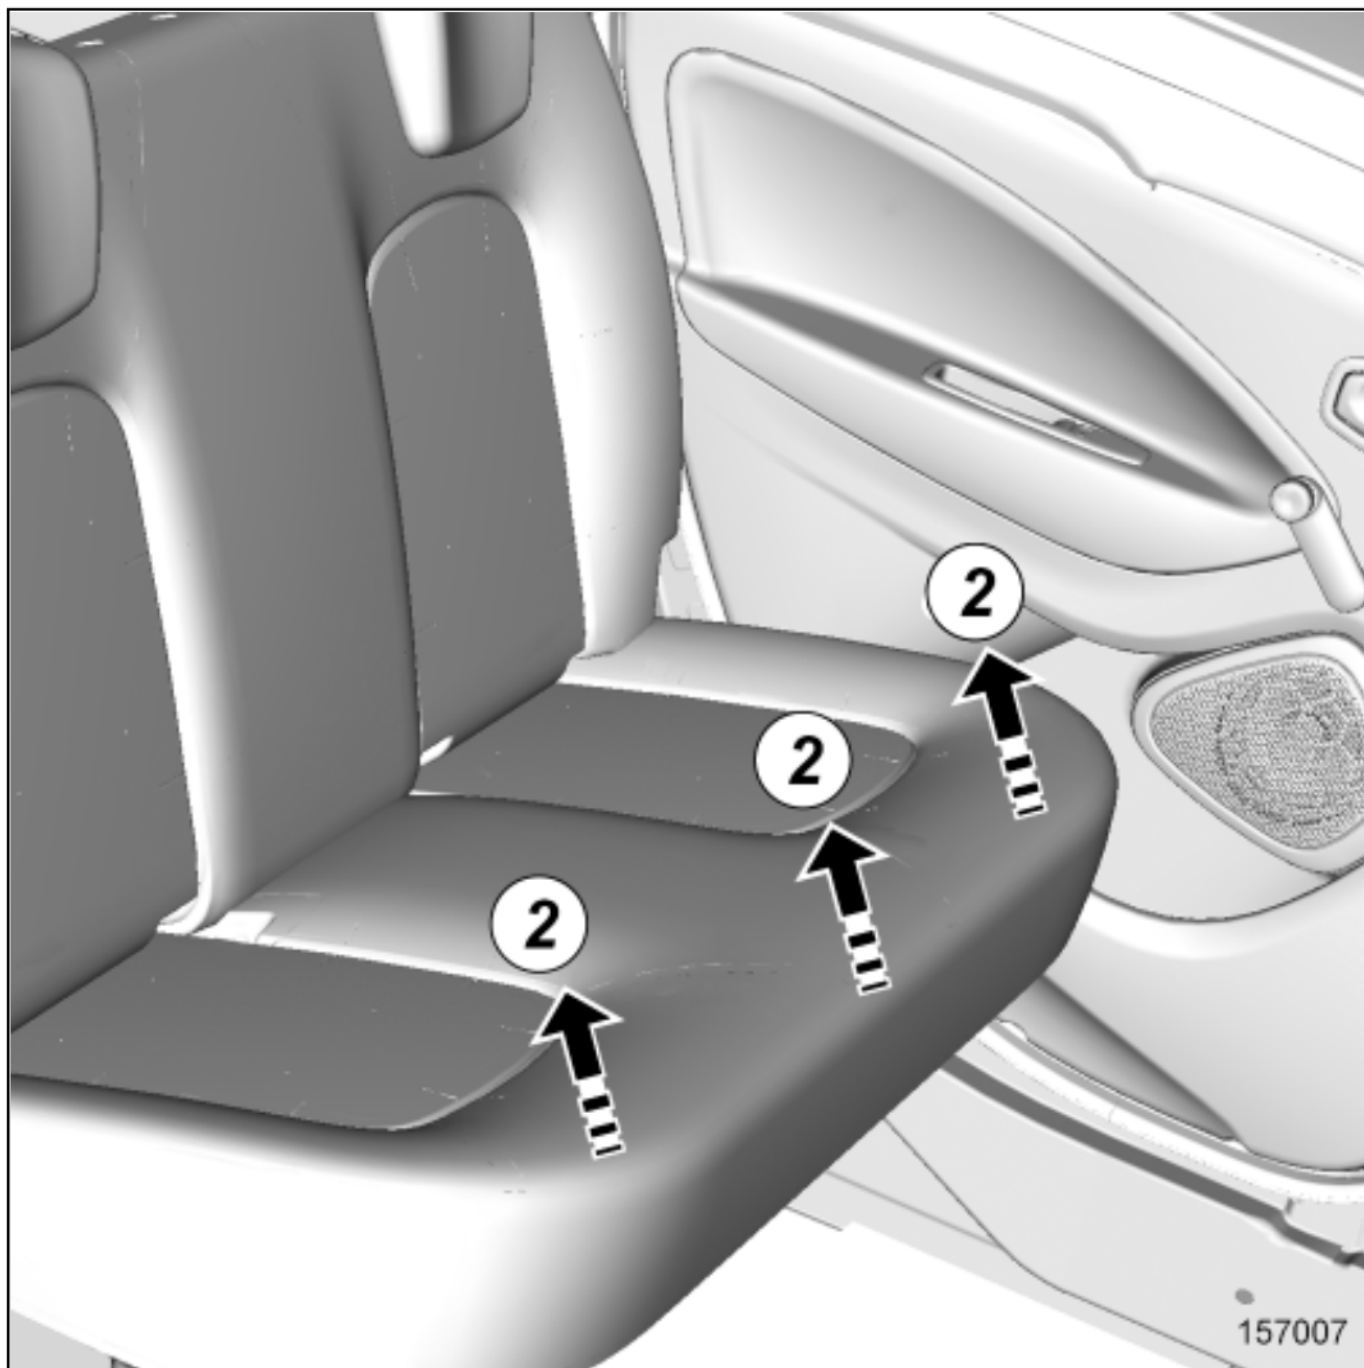

Rear bench seat mounting on body

■ Location and specifications (tightening torques, parts always to be replaced, etc.) [\(see 76A, Rear seat frames and mechanisms, Rear bench seat assembly: Exploded view\)](#) .

## REMOVAL

### 1. REMOVAL PREPARATION OPERATION

### 2. REMOVAL OPERATION

- Unclip the rear bench seat base by pulling it forcefully towards(2) .

Note:

The locking clip of the rear bench seat base mounting clips always breaks whenever the rear bench seat base is removed.

It is necessary to use a vacuum cleaner and an air gun to recover the clip pieces remaining in the body.

## REFITTING

### 1. REFITTING PREPARATION OPERATION

parts always to be replaced:  Rear bench seat mounting on body .

### 2. REFITTING OPERATION

 Proceed in the reverse order to removal.

Note:

When refitting the rear bench seat base, check that the mountings of the rear bench seat base frame are correctly locked on the body by listening for the "clip".

### 3. FINAL OPERATION

 Proceed in the reverse order to removal.
