How interest is charged

We calculate interest daily based on the total amount you owe. We add together all the daily interest amounts in each statement period and add the total to your balance on your statement date. The sooner you make your payments, even before the payment due date, the less interest you will pay. There are some exceptions to these interest rules. Details are available within your terms and conditions.

Estimated interest

This is an estimate of the interest you'll have to pay next month. It assumes:

- you pay only the minimum due
- you pay by the due date
- you have no more transactions before your next statement
- you don't change your statement date
- your standard interest rates and the way we calculate interest don't change

The estimate does not include reduced interest if a promotional rate starts before your next statement is produced.

Important information about Promotional Offers

You will lose any promotional offers if we do not receive your minimum payment on time or you go over your credit limit. The standard rate will apply on the remaining balance.

Other products and services

You can let us know at any time if you don't want to receive information about other Products and Services.
