(<https://go.cpanel.net/whmdocs84TwoFactorAuthentication>)

Two-Factor Authentication

Two-factor authentication (2FA) is an improved security measure that requires two forms of identification: your password and a generated security code. When 2FA is enabled, an app on your smartphone supplies a code that you must enter with your password to log in.

☐ OFFThe Two-Factor Authentication Security Policy is **Disabled**[Settings \(config\)](#)[Manage Users \(users\)](#)[Manage My Account \(myaccount\)](#)
