Dear Customer

Welcome to the 2016/2017 edition of our price list.

We have had a good growing season on the Nursery this year. After a late spring the warm summer and some timely rain soon helped our seeds and plants catch up and flourish and we are now looking forward to the autumn frosts that will mark the start of the planting season. New for this year we are stocking a range of John Chambers Wild Flower Seed to complement your planting schemes. We are not able to list all of the species and size combinations available so if you do not see what you are looking for please contact us.

We are a well-established family run nursery, and comply with EU FRM (Forest Reproductive Material) regulations and have regular plant health inspections this helps to ensure we are providing healthy, good quality stock.

Service and Advice

We pride ourselves in offering a quality comprehensive service for your planting scheme. Please contact us for advice on species selection and protection, planting grants, GIS/Mapping and planting & after care services.

Quality Stock

Our stock is either supplied bare-rooted during October – April or in pots all year round. All of our stock is grown from the best seed available and checked before despatch to ensure the best quality.

Collection/Delivery

All orders should be placed in advance so we can lift and pack your plants. We are a wholesale nursery but are happy to fulfil small orders. Plants may be collected in person from our nursery or we can arrange delivery with our own driver or a next day carrier service (minimum charge £10.00 +VAT).

Before you plant:

The plants that you select for your hedge or planting scheme will vary depending on your location and the ground conditions, we are happy to advise you on what species will be suitable.

Before you plant, remove all the existing weeds from your proposed site. You can either do this by using an appropriate weed spray or removal of the weeds by hand or machine if you are organic.

When to plant:

Late October to early April are the best months for planting bare root stock, it is important that the ground is not waterlogged or frosted. Our pot-grown plants are a good option for planting all year round.

How to plant:

Plants should be notch planted (to the depth of the root collar), and then firmed in with your heel to ensure the roots make good contact with the soil, this helps prevent the plants from 'rocking' in the wind. Larger plants should be pit planted in a prepared hole.

Planting distances:

Hedges: To establish a good strong hedge you can use 5 plants per metre in a double staggered row. Some larger plants can be planted 3 - 4 per metre.

Woodland:

Metres apart	Per Hectare	Per Acre
1m x 1m	10,000	4000
2m x 2m (Conifers)	2500	1000
2.5m x 2.5m (New native woodland)	1600	650
3m x 3m (Wood fuel coppice)	1111	450

Maintenance:

A mulch mat or a layer of well-rotted mulch should be applied after planting to help reduce competition from weeds and retain the moisture in the soil. All plants should be protected from damage by livestock, deer, rabbits and voles. We can supply various sizes of tree/shrub shelters and/or deer or rabbit fencing.

Terms and Conditions

The placing of an order will be held as acceptance of the conditions stated below:

- Prices are wholesale, ex-nursery and subject to VAT at the current rate.
- We reserve the right to alter prices later in the season if necessary, if we need to buy in extra stock.
- All plants are offered subject to being unsold on receipt of a firm order.
- No complaints can be considered unless made within SEVEN DAYS of receiving the plants.

Settlement of Accounts

- For orders collected from the nursery—All orders must be paid for on collection from the nursery either by cash/cheque or credit/debit card.
- Orders being delivered—all orders to be paid in full before dispatch
- For approved customers only, settlement is due 30 days from the date of the invoice.
- We reserve the right to charge 2.5% per month on overdue accounts.
- It is understood that legal title to the goods supplied does not pass to the customer until full payment is received by us.

Cancellations

Should an unfilled order be cancelled after the 31st December 2016, we reserve the right to charge 30% of the value of the order as liquidated damages.

Plant Age

- 1+0 = Bare-root 1 year seedling
- 1+1 = Bare-root 1 year seedling + 1 year transplanted
- 1u1 = Bare-root 2 year seedling undercut in seed bed
- 0+1 = Bare-root 1 year rooted cutting

Height conversions

- 20/40 cm = 8/15 in
- 30/45cm = 12/18 in
- 40/60 cm = 15/24 in
- 60/90 cm = 2/3 ft
- 90/120 cm = 3/4 ft
- 180/210 cm = 6/7 ft

Key

PG = Pot Grown RB = Root Ball T/P = Transplant BR = Bare-Root
RT = Root Trainer STD 10/12 cm = 10/12 cm girth FTD = Feathered Whip
