

# UNICLIC technology

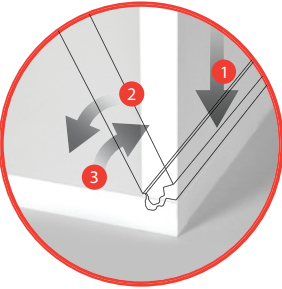

UNICLIC technology is a tongue and groove solution which enables a click connection at an angle of 90°. This revolutionary technology makes it possible to assemble flat packed kitchen cabinets by simply clicking the components together, without requiring any tool, screw or glue!

UNICLIC for furniture technology has won the Interzum Award 2011 Intelligent Material & Design Best of Best.

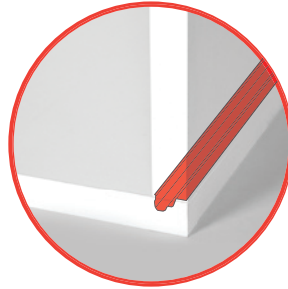

## Fast & easy assembly

The panels of the kitchen cabinet only need to be clicked together. It is as easy as 1,2,3!

## Stronger connection

The click connection is stronger than a traditional assembly system as the joints interlock along the entire assembly length instead of only on 2 fixing points.

# ClicBox offers a complete range

The complete range is available in White, Ivory and Lissa Oak

White
