

## If it's new, it's on Which.co.uk

### See our first look videos of the latest iPhone

When iconic gadgets such as the Apple iPhone 3GS are launched, it's easy to get caught up in the hype.

Our first look reviews take the latest technology (some products even before they're available to buy) and give Which? expert assessments, ahead of sending the gadgets for full testing at the lab.

Check out **Which.co.uk** to keep up-to-date with the most desirable products – and our full test results that are exclusive to Which? members.

The iPhone 3GS essential guide includes several videos – find out about its new video function and updated camera, as well as the map, GPS and compass features.

There's even an interactive simulator to explore features including email, weather and access to the Apple iTunes store.

iPhones are only available on the O2 network but **Which.co.uk** has summarised iPhone prices and tariffs, so you can find the best deal.

The essential 3GS guide can be found at [www.which.co.uk/3GSAugust](http://www.which.co.uk/3GSAugust) and will include full test results (available for Which? members only) on 23 July.

## Best mobile phone brands

# Which.co.uk

If an Apple iPhone isn't for you but you're not sure which mobile to choose next, look no further than our online guide to the best mobile phone brands.

Visit [www.which.co.uk/mobilebrands](http://www.which.co.uk/mobilebrands) to find out how Which? rates best-selling mobile phone brands: Nokia, Sony Ericsson, Motorola, LG and Samsung. We look at each brand's typical phones and highlight what you can expect

– from basic phones to camera, music and smartphone models. With links to handset reviews for each provider, you're sure to find the model and brand for you.
