

# Car summaries

## INDEPENDENT ROAD TESTS

## SAFETY AND SECURITY

## RELIABILITY RATINGS

## OWNER SATISFACTION

**W**hether you're confused about which car to buy or just want to know how your current car stacks up against its rivals, we can help. Over the next 80 pages you'll find reviews for 171 new and used cars, packed with useful information for both buyers and owners.

Of course, every car magazine writes reviews. But what makes a *Which?* review different is the lengths to which we go to

ensure each model is assessed with complete independence. You can find more detail on our testing over the page.

Not only that, we know there's more to choosing a car than just how it performs on the road or in safety tests. The opinions of those who live with it day to day are invaluable and can make the difference between a good car and a bad one. So we also include ownership ratings and reliability feedback in our reviews.

## Our choices

### BEST BUY

Put simply, these are the best new cars you can currently buy. Our hand-picked recommendations not only excel in our independent road tests, safety and security assessments, they also receive good feedback from real-life owners in our annual *Which? Car* survey.

Rest assured, any one of our Best Buy cars should give you years of driving pleasure – as well as offering safe, secure and reliable transport for you and your family.

### WORTH CONSIDERING

Where you see a car flagged as 'Worth Considering', we think it's also worth a place on your test-drive shortlist. Although these are very good cars, they fall short of our Best Buys in one or two key areas, such as safety, security or reliability.

Sometimes, they are just too new for us to recommend without reservation – without any reliability information or crash test results, for example. And in other cases they may be previous Best Buy cars that have started to fall off the pace against some stiff competition from newer rivals.

## Sector index

Superminis	23
Medium cars	39
Large cars	53
Luxury cars	69
MPVs	77
Off-rovers	91
Sports cars	97
