Exclusive at Which.co.uk

Check out the latest online reviews before you set off on holiday

More people are expected to holiday closer to home this year, so whether you're hunting down a remote cottage in the Scottish highlands or seeking out vineyards in France's Loire Valley, one of our Best Buy satnavs will come in handy.

Visit www.which.co.uk/satnavs to find out which 23 products are rated Best Buys (among 105 tested) – only revealed to Which? members. Take the Garmin Nuvi 265 WT, for example. This affordable Best Buy

should help you as you wind down country lanes, as it recalculates routes quickly if you go wrong – and it's easy to program. Both graphics and audio are also clear.

And don't forget about our tests of other products that should get you motoring across the UK and beyond this year. We have four Best Buy roof boxes as well as 38 Best Buy tyres and a handful of Best Buy tyre pressure gauges and pumps. See www.which.co.uk/motoring for the latest details.
